Machine Learning

Lecture Notes

Muxammadrizo Maribjonov

November 3, 2026

Contents

1 Introduction **2**

2 Linear Regression **3**

3 Linear Classification and Logistic Regression **4**

4 Model Selection and Regularization **5**

5 Support Vector Machines and Kernels **6**

6 Decision Trees and Ensemble Methods **7**

7 Clustering **8**

8 Dimensionality Reduction **9**

9 Probabilistic Models **10**

1 Introduction

2 Linear Regression

3 Linear Classification and Logistic Regression

4 Model Selection and Regularization

5 Support Vector Machines and Kernels

6 Decision Trees and Ensemble Methods

7 Clustering

8 Dimensionality Reduction

9 Probabilistic Models
